

Advancing Evidence.
Improving Lives.

For nearly 80 years, the **American Institutes for Research® (AIR®)** has worked alongside leaders and communities to turn research into practical solutions. We provide data-driven insights to help policymakers at the federal, state, and local levels make informed decisions and support effective programs. As a nonprofit, nonpartisan organization, we bring deep expertise across education, health, the workforce, and international development. Our work is grounded in rigorous research, shaped by collaboration, and focused on improving lives.

CAPABILITIES

Research & Evaluation

Generating insights that help people make informed decisions.

Capacity Building & Technical Assistance

Strengthening skills, systems, and organizations to support lasting change.

Data & Technology Solutions

Turning complex data into actionable tools and building user-friendly, secure tech.

Health & Healthcare Improvement

Expanding access to affordable, high-quality, person-centered care.

Strategy, Innovation & Engagement

Helping partners plan, adapt, and connect—so good ideas can scale and grow.

OUR IMPACT

As a trusted government contractor and grantee since 1946, AIR has

- Improved the quality of care in nursing homes across the country
- Helped strengthen pilot screening and expand airplane accessibility
- Advanced highway safety through behavioral and policy research
- Assessed the scope of child homelessness to inform better services
- Led groundbreaking studies identifying what helps U.S. students thrive in a global economy

MESSAGE FROM AIR PRESIDENT AND CEO JESSICA HEPPEN

At AIR, we turn complex research into practical insights that help communities grow stronger, systems work better, and people live better lives. Our work brings research out of the abstract and into real-world problem solving.
